Portable LED germicidal LAMP
with lithium battery

UVc \triangle 4.2w

This portable LAMP produce an Uvc ultraviolet light with a short wavelength of 260nm is able to **destroy microorganism molecular bonds of DNA / RNA** inducing their dead. It is able to **kill up to 99% of bacteria, viruses, germs, molds and allergens** from any surface.

Extremely easy to use, leaves NO chemical residues and does not release harmful substances on surfaces.

equipped with 7 led SMD UVc 0.6w of 260nm and a Lithium ion battery rechargeable by USB that ensure a working time up to 5 hours .

Equipped by a support base with adjustable inclination and quick fixing magnets.

LED status indicator and LED recharge indicator.

Technical specifications

UV section

- LED number: 7
- LED type: SMD
- Overall power: 4.2w
- UV Wavelength: 260-280 nm (UVc radiation)
- Disinfection distance: 1 ~ 10 cm
- Suggested disinfection time: 10 sec ~ 2 min

Head Led status indicator

- LED number: 2x 5mm red color

Charge indicator LED

- Red/ green status LED

- Auto-OFF function: 5 min
- Recharge USB cable: 60 cm (power adapter NOT included)
- Battery: Rechargeable Lithium ion 2000mAh 3.7V
- Recharge time: 2~3 hours
- Dimensions: 360 x 40 x 34 mm

Bathrooms, toilets, showers
and gyms

Bar and shops counters

Computers e office surfaces

Safety aids

Veicle interiors

Home and neonatal environment
